Spameri/Elastic

Václav Čevela / Developer

Máte hledání u vás na webu?

- Databázové hledání je limitující
- Ponořit se do Elasticsearch znamená spoustu polního programování 🚜
- Alternativy jsou: drahé, komplikované, chybí funkčnost (vyber 2 vlastnosti)

VBOSS ElasticQuery version 0.3 brings Result objects ... Latest commit 9fbde74 on 14 Feb

doc	Documentation for creating entity class	6 months ago
src	ElasticQuery version 0.3 brings Result objects	2 months ago
tests	PHPStan and coding standard related fixes	2 months ago

10 Steps to happiness

1. Composer
2. Configure
3. Entity
4. Mapping
5. Export
6. Frontend
7. List
8. Fine tuning
9. ???
10. Profit

1. Composer

composer require **spameri/elastic**

2. Configure

```
extensions:  
  spameriElasticSearch: \Spameri\Elastic\DI\SpameriElasticSearchExtension  
  console: Kdyby\Console\DI\ConsoleExtension  
  monolog: Kdyby\Monolog\DI\MonologExtension
```

2. Configure

```
spameriElasticSearch:  
  host: 192.168.0.14  
  port: 9200
```

Basic usage

```
$result = $this->clientProvider->client()->search(  
    (  
        new \Spameri\ElasticQuery\Document(  
            $index,  
            new \Spameri\ElasticQuery\Document\Body\Plain(  
                $elasticQuery->toArray()  
            ),  
            $index  
        )  
    )->toArray()  
);
```

            $hit->getValue('image'),
            $hit->getValue('price'),
            $hit->getValue('availability'),
            $hit->getValue('tags'),
            $hit->getValue('categories')
        );
    }
}
```

3. Entity - CollectionFactory

```
class SimpleProductCollectionFactory implements \Spameri\Elastic\Factory\ICollectionFactory
{
    public function create(
        \Spameri\Elastic\Model\IService $service
        , array $elasticIds = []
        , \Spameri\Elastic\Entity\IElasticEntity ... $entityCollection
    ) : \Spameri\Elastic\Entity\IElasticEntityCollection
    {
        return new \App\ProductModule\Entity\ProductCollection($service, $elasticIds, ... $entityCollection);
    }
}
```

4. Mapping

```
class SimpleProductConfig implements \Spameri\Elastic\Settings\IndexConfigInterface
{

    /**
     * @var string
     */
    private $indexName;

    public function __construct(
        string $indexName
    )
    {
        $this->indexName = $indexName;
    }
}
```

4. Mapping

```
public function provide(): \Spameri\ElasticQuery\Mapping\Settings
{
    $settings = new \Spameri\ElasticQuery\Mapping\Settings($this->indexName);
    $czechDictionary = new \Spameri\ElasticQuery\Mapping\Analyzer\Custom\CzechDictionary();
    $settings->addAnalyzer($czechDictionary);
}
```

4. Mapping

```
$settings->addMappingField(  
    new \Spameri\ElasticQuery\Mapping\Settings\Mapping\Field(  
        'name',  
        \Spameri\Elastic\Model\ValidateMapping\AllowedValues::TYPE_TEXT,  
        $czechDictionary  
    )  
);
```

5. Export - \Spameri\Elastic\Import\Run

```
public function __construct(  
    string $logDir,  
    \Symfony\Component\Console\Output\OutputInterface $output,  
    \Spameri\Elastic\Import\LoggerHandlerInterface $loggerHandler,  
    \Spameri\Elastic\Import\LockInterface $lock,  
    \Spameri\Elastic\Import\RunHandlerInterface $runHandler,  
    \Spameri\Elastic\Import\DataProviderInterface $dataProvider,  
    \Spameri\Elastic\Import\PrepareImportDataInterface $prepareImportData,  
    \Spameri\Elastic\Import\DataImportInterface $dataImport,  
    \Spameri\Elastic\Import\AfterImportInterface $afterImport  
)
```

5. Export - Output

- Symfony console output
- NullOutput
- ConsoleOutput

5. Export - LoggerHandler

```
class LoggerHandler implements \Spameri\Elastic\Import\LoggerHandlerInterface
{

    /**
     * @var \Psr\Log\LoggerInterface
     */
    private $logger;

    public function __construct(
        \Psr\Log\LoggerInterface $logger
    )
    {
        $this->logger = $logger;
    }

    public function logItemStart($item): void
    {
        $this->logger->debug('Processing item ' . \Tracy\Dumper::toText($item));
    }
}
```

5. Export - LoggerHandler

- Item start
- Item prepared
- Response
- Omit Exception
- Error Exception
- Fatal Exception
- Finish

5. Export - Lock

- Ensures one run at time
- If export takes too long it can extend itself
- If crashed can recover after time element expires
- NullLock variant

5. Export - RunHandler

```
class ConsoleHandler implements \Spameri\Elastic\Import\RunHandlerInterface
{

    public function advance(
        string $runName,
        \Symfony\Component\Console\Helper\ProgressBar $progressBar,
        ?\Spameri\Elastic\Entity\AbstractImport $lastProcessed
    ): void
    {
        $progressBar->advance();
        if ($progressBar->getProgress() % 100) {
            $progressBar->display();
        }
    }
}
```

5. Export - DataProvider

```
interface DataProviderInterface
{

    public function provide(
        \Spameri\Elastic\Import\Run\Options $options
    ): \Generator;

    public function count(
        \Spameri\Elastic\Import\Run\Options $options
    ): int;

}
```

5. Export - DataProvider

```
$query->join('main_alias')->on('product.id = main_alias.main_id');  
$query->join('product_item')->on('product.id = product_item.product_id');  
$query->join('product_item_text')->on('product_item.id = product_item_text.item_id');  
$query->join('product_item_price')->on('product_item.id = product_item_price.item_id')  
    ->and('product_item_price.level_id = 1')  
;  
  
while ($hasResults) {  
    $items = $query->fetchAll();  
  
    yield from $items;  
  
    if ( ! \count($items)) {  
        $hasResults = FALSE;  
    }  
}
```

5. Export - PrepareData

```
interface PrepareImportDataInterface
{
    public function prepare(
        $entityData
    ): \Spameri\Elastic\Entity\AbstractImport;
}
```

5. Export - PrepareData

```
$categories = $this->connection->select('product_parameter_value_text.value')
    ->from('product_parameter_value_text')
    ->join('product_x_parameter_value')
        ->on('product_parameter_value_text.parameter_value_id = product_x_parameter_value.
    ->where('product_x_parameter_value.product_id = %i', $entityData['id'])
    ->where('product_x_parameter_value.parameter_id = %i', 13)
    ->fetchPairs(NULL, 'value')

;

return new \App\ProductModule\Entity\SimpleProduct(
    $elasticId,
    $entityData['id'],
    $entityData['name'],
    $entityData['content_description'],
    $entityData['alias'],
    $imageSrc,
    $entityData['amount'],
    $entityData['availability_id'] === 1 ? 'Skladem' : 'Nedostupné',
    $tags,
    $categories
);
```

5. Export - Import

```
/**
 * @param \App\ProductModule\Entity\SimpleProduct $entity
 */
public function import(
    \Spameri\Elastic\Entity\AbstractImport $entity
): \Spameri\Elastic\Import\ResponseInterface
{
    $id = $this->productService->insert($entity);

    return new \Spameri\Elastic\Import\Response\SimpleResponse(
        $id,
        $entity
    );
}
```

5. Export - AfterImport

- When you need something done after every item
- Cache cleanup
- Identity map purge
- unlink files
- etc

5. Export - ExportToElasticRun

```
class ExportToElastic extends \Spameri\Elastic\Import\Run
{

    public function __construct(
        string $logDir = 'log',
        \Symfony\Component\Console\Output\ConsoleOutput $output,
        \Spameri\Elastic\Import\Run\NullLoggerHandler $loggerHandler,
        \Spameri\Elastic\Import\Lock\NullLock $lock,
        \Spameri\Elastic\Import\RunHandler\NullHandler $runHandler,

        \App\ProductModule\Model\ExportToElastic\DataProvider $dataProvider,
        \App\ProductModule\Model\ExportToElastic\PrepareImportData $prepareImportData,
        \App\ProductModule\Model\ExportToElastic\DataImport $dataImport,

        \Spameri\Elastic\Import\AfterImport\NullAfterImport $afterImport
    )
    {
        parent::__construct($logDir, $output, $loggerHandler, $lock, $runHandler, $dataProvider,
    }
}
```

5. Export - Command

- Delete old index
- Create new index
- Put settings
- Put mappings
- Put data

5. Export - Command

```
$options = new \Spameri\Elastic\Import\Run\Options(600);

// Clear index
try {
    $this->delete->execute($this->simpleProductConfig->provide()->indexName());
} catch (\Spameri\Elastic\Exception\ElasticSearchException $exception) {}

// Create index
$this->create->execute(
    $this->simpleProductConfig->provide()->indexName(),
    $this->simpleProductConfig->provide()->toArray()
);

// Export
$this->exportToElastic->execute($options);
```

6. Frontend - Presenter

SimpleProductListPresenter::renderDefault(\$queryString)

```
$this->getTemplate()->add(
    'products',
    $products
);
$this->getTemplate()->add(
    'queryString',
    $queryString
);
```

6. Frontend - Form

CreateComponentSearchForm

```
$form = new \Nette\Application\UI\Form();  
$form->addText('queryString', 'query')  
        ->setAttribute('class', 'inp-text suggest');  
  
$form->addSubmit('search', 'Search');
```

6. Frontend - Latte

```
<div class="product-list products-list-full">
  <ul class="reset products full-products">
    {foreach $products as $product}
      <li>
        <div class="spc">
          <a href="//benu.cz/{<$product->getAlias()}<}" class="detail" style="height: 321px">
            <h2 class="title">
              <span class="img">
                
              <span class="name" style="height: 48px;">{<$product->getName()}</span>
            </h2>
          </a>
        </div>
      </li>
    </foreach>
  </ul>
</div>
```

7. Search - Name

```
$query = new \Spameri\ElasticQuery\ElasticQuery();  
$subQuery = new \Spameri\ElasticQuery\Query\QueryCollection();  
$subQuery->addShouldQuery(  
    new \Spameri\ElasticQuery\Query\Match(  
        'name',  
        $queryString  
    )  
);
```

7. Search - Entities

```
try {  
    $products = $this->productService->getAllBy($query);  
  
} catch (\Spameri\Elastic\Exception\ElasticSearchException $exception) {  
    $products = [];  
}
```
